Course Summary

Course Description	This course is designed to explore the politics around the world based on a comparative perspective. Students will examine the similarities and differences across various countries and learn about diverse approaches to analyzing the political world. Topics covered in this course include the state, democracy and authoritarianism, democratization, democratic types, elections and electoral systems, social cleavages and party systems, institutional veto players, and the outcomes of democratic institutions. This course aims to introduce students to some of the most significant political developments in the contemporary world and provide the latest explanations for these phenomena. Additionally, students will develop the critical thinking skills necessary to evaluate these explanations. Through this course, students are expected to gain an understanding of current arguments regarding major political developments globally and approach these issues with a critical perspective.
Description Related Courses	There are no designated prerequisite courses for this class; however, prior completion of Introduction to Political Science would be beneficial.

Course Goals	The course aims to develop students' expertise in the comparative politics field and foster their logical thinking skills, self-directed learning abilities, and global citizenship competencies.
Projected Results	Through this course, students will acquire fundamental knowledge essential for understanding comparative politics and develop global citizenship competencies through an English-based class.
Percentage of the original language classes(%)	The goal of this course is to deliver a 100% English-taught class. However, as this course is a required subject in the Department of Political Science and International Relations, it is necessary to consider the varying levels of foreign language proficiency among students. To support those who may find English challenging, brief explanations in Korean will be provided at the end of each lecture, and students will be allowed to ask questions in Korean. Lecture slides (PPT) will be shared before each class, and a Korean summary will be distributed afterward.
